

Failure mode analysis — Base Policy

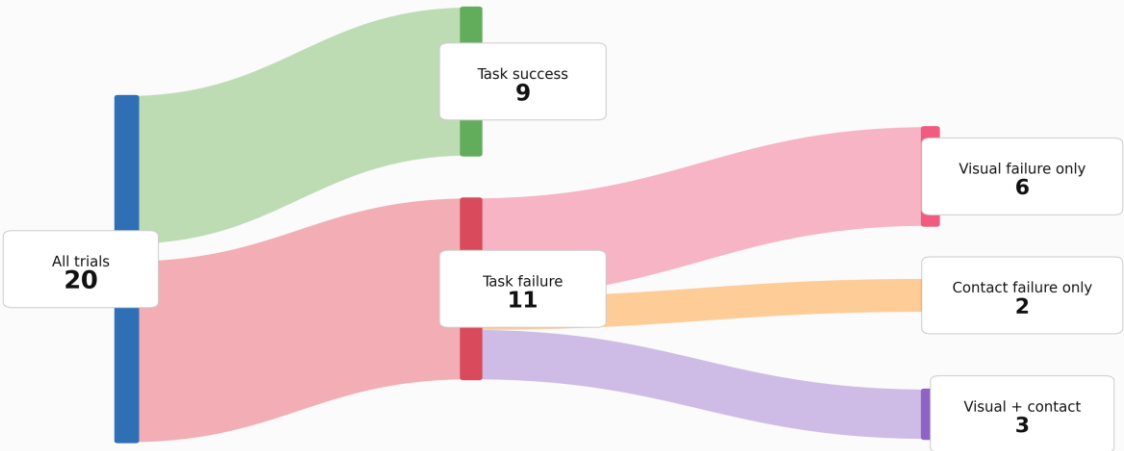

20 trials · success 30% · visual success 55% · contact success 40%

Failure categories are exclusive combinations. Visual failure = chose the wrong side or fail to grasp; contact failure = fail to insert, and fail to grasp counts as both.

Failure mode analysis — Tactile Guidance

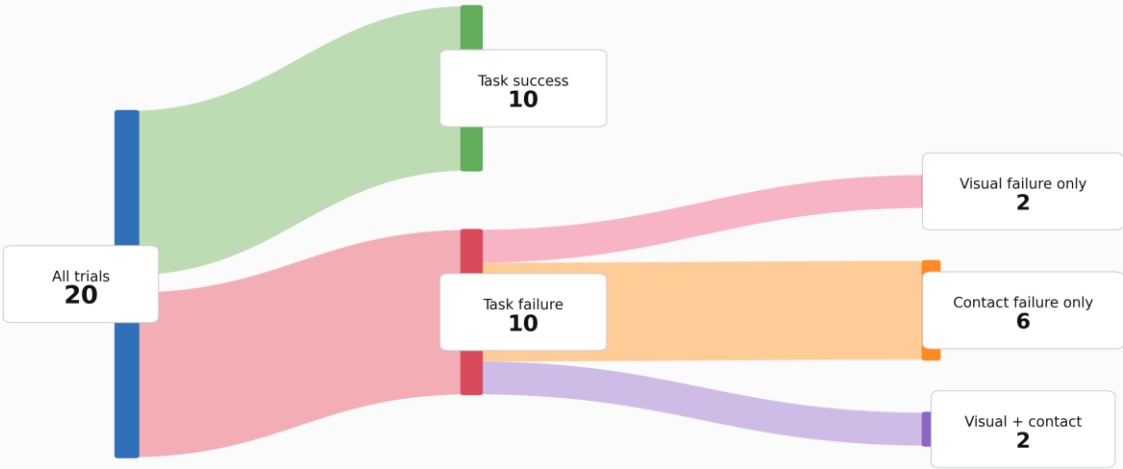

20 trials · success 45% · visual success 55% · contact success 75%

Failure categories are exclusive combinations. Visual failure = chose the wrong side or fail to grasp; contact failure = fail to insert, and fail to grasp counts as both.

Failure mode analysis — Naive Combination

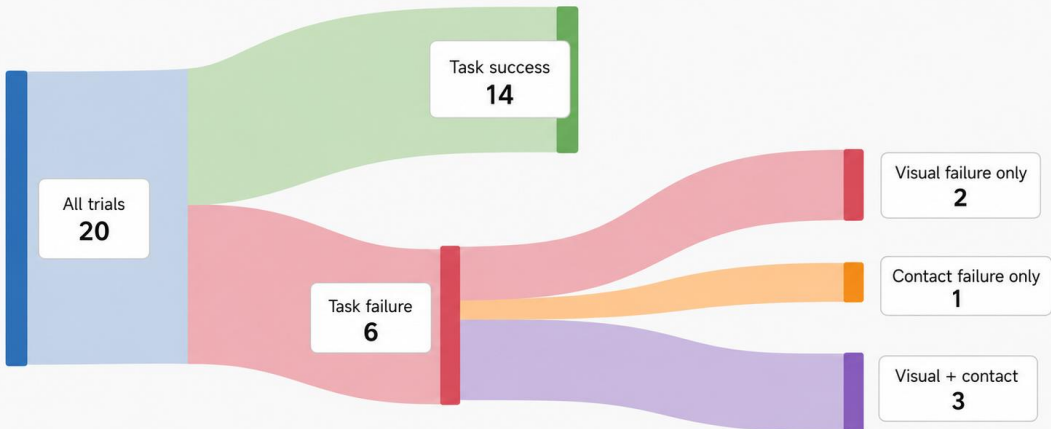

20 trials · success 50% · visual success 80% · contact success 60%

Failure categories are exclusive combinations. Visual failure = chose the wrong side or fail to grasp; contact failure = fail to insert, and fail to grasp counts as both.

Failure mode analysis — Ours

20 trials · success 70% · visual success 75% · contact success 80%

Failure categories are exclusive combinations. Visual failure = chose the wrong side or fail to grasp; contact failure = fail to insert, and fail to grasp counts as both.
