

Failure mode analysis — Base Policy

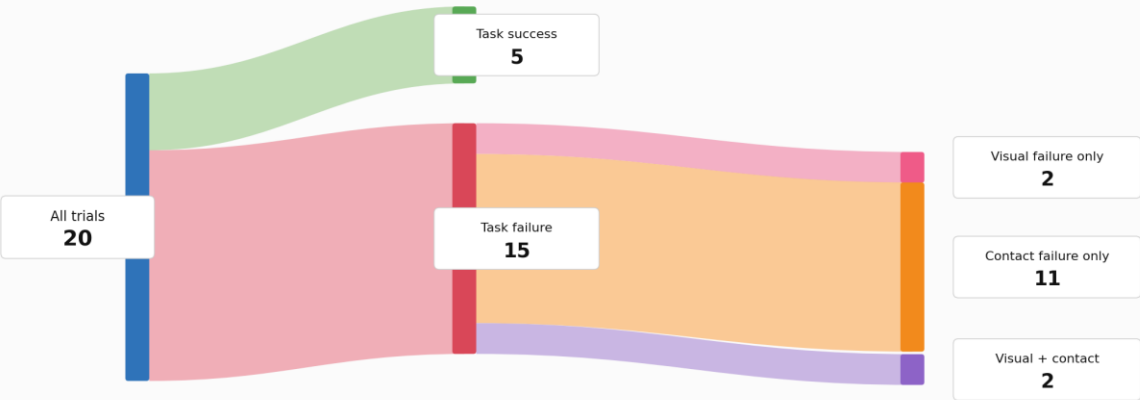

20 trials · success 15% · visual success 45% · contact success 30%

Failure categories are exclusive combinations. Visual failure = wrong color, fail to put back, or fail to grasp; contact failure = fail to grasp or spill.

Failure mode analysis — Visual Sampling

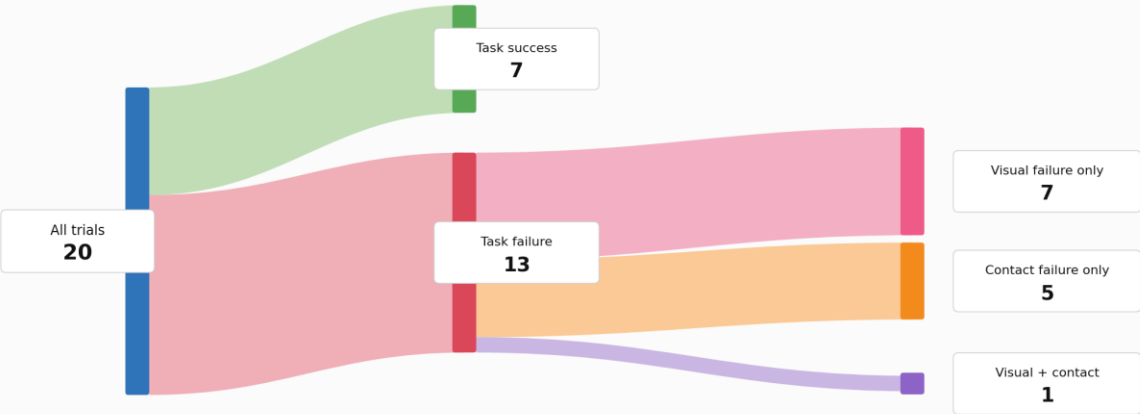

20 trials · success 25% · visual success 80% · contact success 35%

Failure categories are exclusive combinations. Visual failure = wrong color, fail to put back, or fail to grasp; contact failure = fail to grasp or spill.

Failure mode analysis — Naive Combination

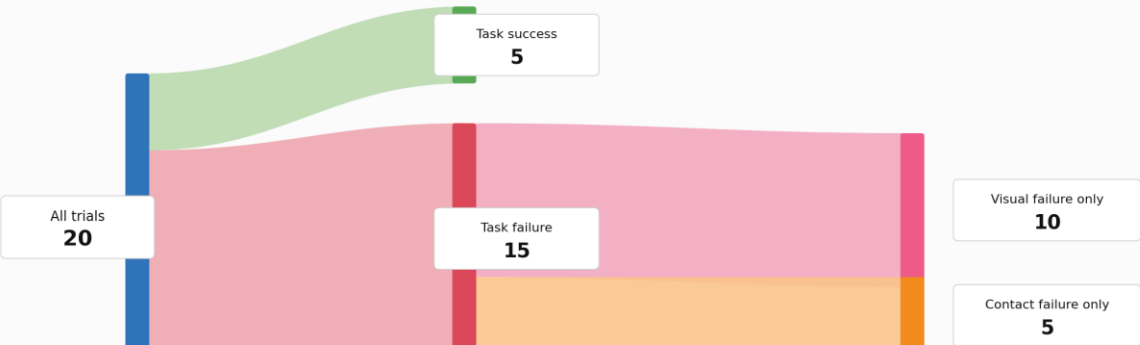

20 trials · success 35% · visual success 60% · contact success 70%

Failure categories are exclusive combinations. Visual failure = wrong color, fail to put back, or fail to grasp; contact failure = fail to grasp or spill.

Failure mode analysis — Tactile Guidance

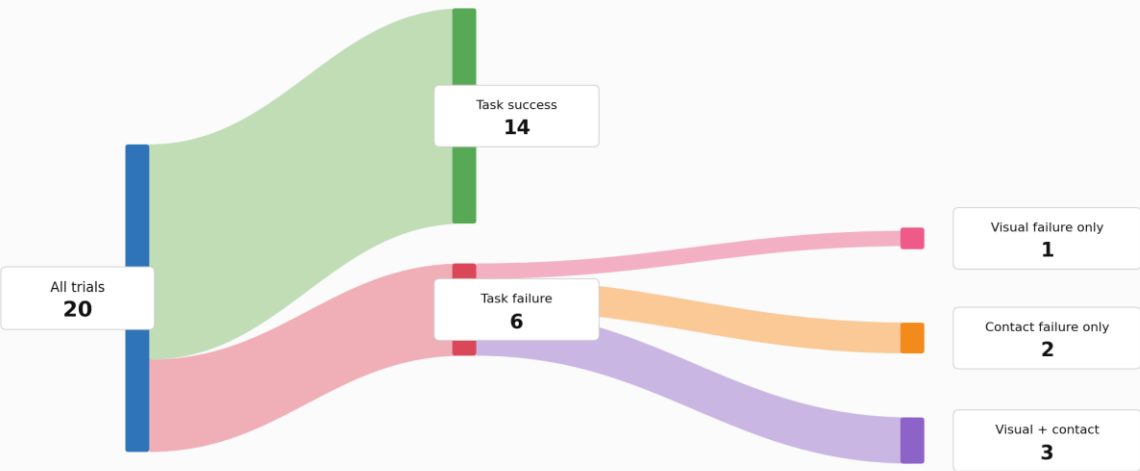

20 trials · success 25% · visual success 50% · contact success 75%

Failure categories are exclusive combinations. Visual failure = wrong color, fail to put back, or fail to grasp; contact failure = fail to grasp or spill.

Failure mode analysis — Ours

20 trials · success 70% · visual success 80% · contact success 75%

Failure categories are exclusive combinations. Visual failure = wrong color, fail to put back, or fail to grasp; contact failure = fail to grasp or spill.
